

BrightTonix

Y10

Revolutionary Mouth Rejuvenation

I'm using Y10 from BrightTonix for several months in my practice. After initial skepticism, I can say that the results exceeded by far my expectations. On one hand, the chair time is actually only a maximum of 35 minutes per patient. On the other hand no preparation is necessary and the treatment is done by an assistant. Concerning the results and the effect of the combination of radio waves and this special toothpaste,

we can say that we can notice a significant improvement in oral hygiene markers. Furthermore, the average results of tooth whitening are about 6 shades.

Basically, the following can be observed: Y10 has no negative side effects, does not attack the enamel in any way and does not produce a burning on the gum. We could not find any pain or irritation after the treatments in any of our cases. Whether Y10 is also able to mitigate periodontal problems is close, but should be demonstrated in clinical trials.

My patients are very happy with the results and so am I.
