

BrightTonix

Y10
Faster, Safer, Brighter

Revolutionary Mouth Rejuvenation

I use Y10 from BrightTonix for about 2 months very successfully in my practice. In the meantime, I have given a 30-minute treatment to more than 30 patients. The results were consistently significant: on average a tooth whitening of 6 shades was achieved, which remained constant even after a recall after 14 days. Furthermore, my patients told me that the entire oral cavity is much fresher and firmer. I personally can recommend treatments, from my experience, with Y10, because the results are significant and have no side effects. For me this is the most careful teeth whitening I have ever been able to apply in my practice.
